

Illinois Commission on Equity and Inclusion

Nina M. Harris, Chairperson
Alexandria Wilson, Executive Director
115 S. LaSalle Street, 4th Floor
Chicago, IL 60603

February 27, 2026

Governor Pritzker, Members of the General Assembly, and the Bureau on Apprenticeship Programs and Clean Energy Jobs:

On behalf of the Illinois Commission on Equity and Inclusion (CEI), and per 30 ILCS 575/4f(4), I am pleased to present the annual Fiscal Year 2025 Service Category Report for the Business Enterprise Program for Minorities, Women, and Persons with Disabilities (BEP).

The State of Illinois remains deeply committed to expanding the participation of businesses owned by minorities, women, and persons with disabilities across a broad range of professional service sectors, including insurance, investment management, information technology, accounting, architectural and engineering, and legal services. State agencies and public institutions of higher education are expected to maximize the use of these businesses while upholding their financial and fiduciary responsibilities.

This annual report on service categories reflects a year of continued progress, strengthened collaboration, and a deepened commitment to advancing equity across our programs and services. Throughout the year, we focused on clarifying reporting requirements, improving transparency, and using data-driven insights to guide our decisions. While we recognize the gains made, we remain clear-eyed about the work ahead. Our efforts this year lay a strong foundation for the strategic actions and partnerships that will drive meaningful, measurable impact in the years to come.

Equally important is the State's responsibility to identify and eliminate barriers that restrict full and fair access to procurement and contracting opportunities. This report outlines the progress achieved over the past year and presents the service-category performance of State agencies and public institutions of higher education. It also highlights the State's continued advancement in increasing the participation of service firms owned by minorities, women, and persons with disabilities, while reaffirming our commitment to fostering a more inclusive, competitive, and representative marketplace for all Illinois businesses.

As we continue to move forward, we remain firmly committed to cultivating an inclusive and equitable procurement environment that truly reflects the diversity of our communities, ensuring that every public dollar generates positive social impact and strengthens economic opportunity.

Respectfully,

Alexandria M. Wilson
Executive Director

**Commission on Equity and Inclusion Business Enterprise
Program Service Category Report
Fiscal Year 2025**

Executive Summary

The Commission on Equity and Inclusion (CEI) submits this Fiscal Year 2025 (FY25) Service Category Report on behalf of the Business Enterprise Council for Minorities, Women, and Persons with Disabilities (BEP Council) to Governor Pritzker, the General Assembly, and the Bureau on Apprenticeship Programs and Clean Energy Jobs. This report identifies the service firms utilized by each State of Illinois (State) agency and public institution of higher education, outlines the efforts made to enhance the utilization of service firms owned by minorities, women, and persons with disabilities, and presents any recommendations provided by the BEP Council to encourage greater involvement of such service firms by State agencies and public institutions of higher education.

The data in this report was submitted to CEI by the purchasing entities subject to the Business Enterprise for Minorities, Women, and Persons with Disabilities Act (BEP Act) in their FY25 Annual BEP Expenditure Report and Service Category Report submissions.

CEI continues to support, promote, and encourage the economic development of minorities, women, and persons with disabilities participating in State procurement as prime vendors and subcontractors in insurance, investment management, information technology, accounting, architectural and engineering, and legal services through its Business Enterprise Program (BEP).

When a State agency or public institution of higher education, excluding community colleges, awards a contract for insurance services, it should strive to use insurance brokers owned by minorities, women, and persons with disabilities, as defined by the BEP Act, for at least 20% of the total annual premiums or fees. Specifically, contracts representing at least 11% of annual premiums or fees must be awarded to minority-owned businesses. Contracts accounting for at least 7% of annual premiums or fees must be awarded to women-owned businesses. Contracts totaling at least 2% of the total annual premiums or fees must be awarded to businesses owned by persons with disabilities. 11 community colleges, 2 universities, and 1 state agency comprise the 14 entities that reported utilization of insurance services contracts during FY25. A total of \$5,451 in premiums was placed across the three contracts awarded to two diversity-owned service firms. The reported risk total for fiscal year 2025 across all entities was \$10,224,335,931.

When a State agency or public institution of higher education, excluding community colleges, awards a contract for investment services, it must aim to use emerging investment managers owned by minorities, women, and persons with disabilities, as defined by the BEP Act, for a minimum of 20% of the total annual premiums or fees. Specifically, contracts representing at least 11% of annual premiums or fees must be awarded to minority-owned businesses. Contracts representing at least 7% of annual premiums or fees must be awarded to women-owned businesses. Contracts representing at least 2% of the total annual premiums or fees must be awarded to businesses owned by persons with disabilities. Additionally, it is the aspirational goal that at least 20% of the direct asset managers of the State funds be minorities, women, and persons with disabilities. The notable achievement for investment services was accomplished by community colleges.

The professional services category comprises accounting, architectural, engineering, information technology, and legal services. When a State agency or public institution of higher education, excluding community colleges, awards contracts for certain professional services, including information technology, accounting, architectural and engineering, and legal services, the aspirational goal is to use firms owned by minorities, women, and persons with disabilities, as well

as lawyers from these groups, for at least 20% of the total dollar amount of State contracts.

During FY25, 16 entities reported using accounting service contracts. Of those 16 contracts, 9 were awarded to diversity-owned service firms, resulting in \$62,970 in payments. This represents 4% of the total Accounting Services fund expenditures reported for FY25.

In FY25, 33 entities reported contracting with architectural and engineering firms, reflecting continued statewide demand for A&E services. Of the \$1,288,460,034 paid to firms, 18% (\$235,156,444) went to diversity-owned architectural and engineering firms, resulting in a \$142,693,623 increase from the previous year.

Diversity-owned firms were paid \$81,613,619 by 30 agencies and public institutions of higher education that contracted for information technology services. This represents an 8% increase over the total dollar amount paid to diversity-owned service firms during FY24. Diversity-owned firms received 21% of the dollars reported as paid to firms in the information technology service category.

Additionally, 13 entities reported contracting with legal services firms during fiscal year 2025. Of the \$21,618,288 paid to all firms, 40% or \$8,723,790 was awarded to diversity-owned legal services firms, representing a \$1,714,510 increase from the previous year.

The 20% aspirational goal underscores the State's ongoing commitment to advancing diversity and inclusion across professional service sectors. These goals encourage agencies and public institutions of higher education to actively seek out and engage diverse vendors and legal professionals, helping to build a more inclusive and representative marketplace. With the exception of architectural and engineering services, CEI's professional services goal attainment average has exceeded the aspirational goal of using firms owned by minorities, women, and persons with disabilities, as well as lawyers from these groups, for at least 20% of the total dollar amount of State contracts. Through these aspirational goals, the State works to broaden access to opportunity and advance fair representation in the procurement process by encouraging the inclusion of businesses and legal professionals from underrepresented groups.

Community Colleges

When a community college awards contracts for insurance, investment, information technology, accounting, architectural and engineering, and legal services, there is an aspirational goal for the community college to use businesses owned by minorities, women, and persons with disabilities for at least 20% of the total contract spending for these services collectively. However, for investment services contracts, investment managers who are not considered emerging investment managers are not counted towards these diversity goals.

11 community colleges, 2 universities, and 1 state agency comprise the 14 entities that reported utilization of insurance services contracts during FY25. A total of \$5,451 in premiums was placed across the three contracts awarded to two diversity-owned service firms. The reported risk total for fiscal year 2025 across all entities was \$10,224,335,931.

During FY25, 5 community colleges reported using investment services contracts, resulting in a combined total of \$610,207,207 in funds under management. A diversity-owned emerging investment manager oversaw \$60,000,000 of these funds and received

\$200,000 of the \$695,204 generated in commissions and fees.

During FY25, community colleges reported total expenditures of \$100,320,197 across all four professional service categories. The total dollar amount paid to prime service firms across all service categories was \$71,794,105. The total dollar amount paid to diversity-owned service firms across all service categories was \$28,826,092. 29% of expenditures across all professional service categories were paid to diverse-owned service firms.

The total FY25 community college expenditures in the accounting services category were \$1,002,875. The total amount paid to prime service firms in this category was \$1,002,875. No funds were paid to diversity-owned service firms in this category during FY25.

The total FY25 community college expenditures for architectural and engineering services were \$39,353,535. The total dollar amount paid to prime service firms across the architectural and engineering service category was \$25,646,391. The total dollar amount paid to diversity-owned service firms across this category was \$13,707,144. 35% of expenditures in the architectural and engineering professional service category were paid to diversity-owned service firms.

For FY25, total community college expenditures for information technology services were \$57,709,304. Of that amount, \$42,638,645 was paid to prime service firms, and \$15,070,659 was paid to diversity-owned service firms. In the information technology professional services category, 26% of expenditures were paid to diversity-owned service firms.

For FY25, total community college expenditures for legal services were \$2,254,483. Of that amount, \$2,206,194 was paid to prime service firms, and \$48,289 was paid to diversity-owned service firms. 2% of expenditures in the Legal services category were paid to diversity-owned service firms.

Community colleges must continue strengthening diversity and inclusion in their procurement practices by sustaining efforts to set aspirational goals and define specific targets for engaging businesses owned by underrepresented groups. These goals also reinforce the importance of applying diversity standards consistently across contract types. While significant progress has been made, additional action, particularly in the accounting services category, is necessary to fully realize the State's vision for equitable participation across all professional service areas.

Contracts

In FY25, 3,177 contract awards were subject to service category reporting, of which 283 were awarded to diverse service firms. In the previous fiscal year, 366 of 4,147 service contracts were awarded to diverse service firms.

While FY25 shows modest improvements in expenditures and the share paid to diverse firms, the BEP and the BEP Council remain resolute in addressing areas where progress has fallen short of expectations. Continued improvement will require intentional strategies and deeper partnerships with councils of government, professional business organizations, chambers of commerce, community partners, and purchasing entities. Strengthening supplier diversity throughout the procurement process will also depend on expanding mentorship and capacity-building

opportunities that help diverse firms grow and compete.

Closing barriers to supplier diversity will require a more focused and sustained course of action. Initiatives such as CEI's Mentor-Protégé Program (MPP) will play a critical role in empowering small and diverse businesses to build the experience and capacity needed to become prime contractors on future projects. Through ongoing collaboration, accountability, and a shared commitment to the program's mission, the BEP and the BEP Council can drive the lasting, systemic change necessary to counteract underrepresentation across professional service sectors.
